

About LoggerHead Tools

Company and Mission

LoggerHead Tools LLC designs, develops and commercializes innovative, new-to-the-world tools manufactured in the United States. Its mission is to create value-added, problem-solving innovations that provide enhanced value to its customers. The founder of LoggerHead Tools is Dan Brown, a Chicago inventor who holds over 35 U.S. utility patents.

Products

In 2005, LoggerHead Tools launched its flagship product, the Bionic Wrench® as a new class of hand tool differentiated by the way it grips nuts and bolts on all sides. In 2006, the company introduced an open-ended version of the Bionic Wrench called the Bionic Grip™, as well as the ImmiX™, a multi-tools series that combines the 6-inch Bionic Wrench, screwdriver bits, and optional retractable stainless steel knife blades in the handle. In 2007, LoggerHead Tools introduced the Pro-Gear line of professional grade tools, which features versions of the Bionic Wrench and Bionic Grip with durable nickel finish and an Interlock™ mechanism that stays engaged while under torque load. Later that year the company introduced the Bit Dr.™, a pocket screwdriver that packs the function of a 21-piece driver set in the weight of a standard screwdriver.

Awards

LoggerHead Tools has received several product awards for innovative design:

- 2017 North American Retail Hardware Association "Retailers Choice Award"
- 2009 Popular Mechanics, "Breakthrough Innovation Award"
- 2007 iF award from the International Design Forum (iF) for the ImmiX
- Nominated for the 2007 German Design Award, the design award of the Federal Republic of Germany for the Bionic Wrench
